Project Update – Friday November 15, 2013
As of this morning Friday November 15, 2013, both northbound and southbound lanes are opened to 3 lanes unrestricted traffic.

The traffic control subcontractor still has some signs and drums to get off the roadway, which he will complete by early next week.

Project Update - Thursday November 14, 2013
Today, Thursday November 14, 2013, is the scheduled completion date for the project. As of 1:00 pm this afternoon, the contractor should meet the completion date with no problem. There is some cleanup work remaining on the median side of the southbound lanes and on the outside of the northbound lanes. This cleanup should be completed by tonight.

The traffic is currently reduced to 2 lanes in each direction. By late tonight, the lane closures should be removed and both Northbound and Southbound will be opened to 3 lanes unrestricted traffic.

There is some minor work that needs to be done on the project. Portions of the southbound edgeline at the acceleration lane and the northbound edgeline at the crossovers need to be painted. The contractor will do this work sometime at night next week utilizing their attenuator truck and a rolling lane slow-down.

There is also some restoration work that needs to be done on the Wisconsin River barge landing. This should be completed by the middle of next week.

Thanks to the freeway service team and the Wisconsin State Patrol for their assistance during this project. There were no major accidents in the work zone during any of the 4 stages, going back to February 2012.
