

The Columbia County Division of Health is excited to announce that two Public Health Nurses were recently trained to be Nurse-Family Partnership home visitors!

What is Nurse-Family Partnership (NFP)?

Nurse-Family Partnership® (NFP) is an evidence-based, community health program that serves low-income women pregnant with their first child. Each vulnerable new mom is partnered with a registered nurse early in her pregnancy and receives ongoing nurse home visits. It is a life-transforming partnership, for the mom and her child.

Why is Columbia County doing this?

Nurse-Family Partnership helps families — and the communities they live in — become stronger while saving money for state, local and federal governments.

How does NFP help families?

The Nurse-Family Partnership program is delivered by registered nurses who are perceived as trusted and competent professionals, fostering a powerful bond between nurse and mother.

Nurse-Family Partnership is a **free**, voluntary program that partners first-time moms with nurses. When a pregnant woman enrolls in the program, a trained nurse will be available to her until her baby turns two years old.

The Nurse Family Partnership nurse provides support and helps answer families' questions. The nurse helps moms have a healthy pregnancy, gives coaching on child development, and empowers moms to pursue their heart's desires. The nurse will always be there for her moms, so they can be there for their babies!

A lot's gonna change

You've got this!

with a free personal nurse

that can give you the support, advice and information
you need as a new mom, pregnant with your first baby.
