

Project Lifesaver Facts.....

**Locator Systems
VHF Transmitter**

Change Battery

Lithium Ion Battery

- ❖ Waterproof in up to 6 feet water for 30 minutes
- ❖ Robust digital ID for additional client verification
- ❖ Ergonomic Design
- ❖ Impact resistant Polycarbonate plastic housing
- ❖ FCC and Industry Canada approved
- ❖ Startup package per client \$300 (Includes: Transmitter, Tester, 12 Wristbands, 12 Lithium-Ion Batteries)
- ❖ Lithium-Ion batteries holds charge up to 30 days
- ❖ Approximate yearly maintenance cost \$75
- ❖ Transmitter tested daily and recorded on Inspection Form
- ❖ Monthly visit from Certified Project Lifesaver Deputy
- ❖ Tracking device is portable and can be taken up in an aircraft
- ❖ Signal range covers ½ - 1 mile on ground and 7 miles from air
- ❖ Project Lifesaver Program vs. GPS: persons can be located most anywhere, GPS does not always locate in certain places (culverts, some buildings, etc.)
- ❖ Person can be located in minutes vs. hours or days (average time is 30 minutes)
- ❖ Locator System does not require satellite technology
- ❖ Peace of mind to family with a "Special Needs Loved One" ie. Dementia, Autism, Down Syndrome, etc.
