SITE PLAN

Instructions:

If a survey is available, sometimes it works well to sketch your proposal directly on a copy of the survey. Be sure to use a ruler. Freehand drawings are often of questionable accuracy, and can easily distort the relationship between various physical features on the property. **This application should only be completed when you have staked the building site and accurately measured the distances (*Please, No Estimates!*).** An inspection from our department may be necessary before a permit is issued. Incomplete and inaccurate information may cause delay in issuing your permit. **Please review checklist on reverse side for specific Site Plan requirements.**
