LICENSE NUMBER OF INSPECTOR/PUMPER:
(required)

COMMENTS

- The private sewage disposal system, including the treatment tank, is in proper operating condition.
- The septic tank was recently pumped by a licensed septic tank pumper, or it was inspected and is less than 1/3 full of sludge or scum. Date pumped
(required)
- Baffles in place.
- The effluent filter has been inspected and/or cleaned. All septic systems approved after July 1, 2000 were required to have an effluent filter installed in the septic tank. If your system was approved before this date, you are not required to install a filter, but it is usually recommended.
- There is no evidence of wastewater or effluent from the system ponding on the surface of the ground.
