PUBLIC HEALTH ADVISORY

The Wisconsin Department of Health Services Issues Public Health Advisory Over Omicron Concerns

On December 20, 2021, the Wisconsin Department of Health Services (DHS), issued a public health advisory in light of the rapidly spreading Omicron variant.

To stop COVID-19 cases from overwhelming our health care system, all Wisconsinites should:

- Get vaccinated for COVID-19, including getting a booster
- Wear a well-fitted mask in public indoor spaces
- Get tested for COVID-19 before visiting friends and family

YOU STOP THE SPREAD

The Wisconsin Department of Health Services (DHS) is advising all Wisconsinites to take immediate action to prevent hospitalizations and death. There is a serious risk that increased numbers of COVID-19 cases will overwhelm our already strained health care system, leading to dangerous situations where patients experiencing medical emergencies may not be able to receive immediate, adequate, life-saving attention and care.
